SAVINGS & LOAN ASSOCIATIONS

GENERAL REMARKS

In compliance with the provisions of Louisiana Revised Statutes, there is submitted herewith report of the condition of the sixty-six state chartered savings and loan associations, and branches, in Louisiana, for the period ending December 31, 1982.

Total resources of the sixty-six state chartered savings and loan associations, for this period, totaled $6,068,840,814, an increase of $341,430,469 since the previous year. This increase represents a 5.96% growth rate.

The growth is contributed to aggressively seeking new savings and mergers of federally chartered associations into state chartered associations.

Outstanding mortgage loans, at the close of business December 31, 1982, amounted to $4,685,812,227. This was an increase of $91,552,588 or 2.0%. Loans in process were $22,058,886. This is a 27.42% increase over the December 31, 1981 reporting date. The increases are attributed to a slight decline in interest rates, wholesale adoption of new mortgage instruments, and an active secondary market for home loans.

At the end of the period, the associations had 939,442 shareholders who owned $5,183,906,902 of various savings accounts or certificates for a 4.85% growth rate. The growth is attributed to aggressively seeking new savings accounts, expanded powers and authority for the savings and loan industry, and merger of federal associations into state chartered associations.

Regulatory net worth of state chartered savings and loan associations declined at a rate of 13.92% per year. This is a significant reduction over the 18.06% decline rate reported at the period ending December 31, 1981. As of December 31, 1982, regulatory net worth amounted to $249,551,401. Thirteen of the sixty-six state chartered associations were profitable for the year. The decline in net worth is attributable, primarily, to the high cost of funds; however, adjustment to market conditions, a decline in interest rates and use of net worth write-ups through appraised equity capital and net worth certificates are expected to further implement a slowdown in the decline of net worth. The sixty-six state chartered associations enjoyed an average 4.10% ratio of net worth to total assets at year end which is well above the 3% required net worth of all savings and loan associations.

The Office of Financial Institutions devoted much time attempting to preserve the dual chartering system. For example, during the reporting period, approval was granted eight (8) federal associations and four (4) state associations to merge into state chartered institutions. At this time, we are aware of two mergers pending.

Louisiana Savings Association became the first state chartered mutual association to convert to a stock association. Two other conversion applications are pending.

In addition, several rules were published that will enable our state chartered associations to operate more effectively in an ever increasing competitive environment.

Some significant changes have occurred in the major indicators. The increase in total resources and savings accounts, as well as the decline in interest rates, are all positive factors. If these trends continue, 1983 will be a profitable year for state chartered savings and loan associations.
